- Oxy-Shield Landscapers Steel
- Develops a rich, earthy patina
- Resists corrosion - durable long-lasting steel

DECORATIVE GARDEN FEATURE WITH NATURAL EARTHY TONES

Bring new life and a touch of zen to your outdoors.

Whites Oxy-Shield Interlocking Tree Ring is easy to install - just tap in place and lock together, and suitable for small and large trees; interlocking tabs can make larger tree rings. Rings can also be added once tree is already planted.

Oxy-Shield is a specially formulated landscaping steel designed to impart a decorative rust-look without the inherent degradation of regular steel.

With similar properties to Stainless Steel, Oxy-Shield will oxidise and form a protective coating that is resistant to corrosion and flaking.

Rustic tones will continue to oxidise and enhance over time to produce a unique finish. To accelerate the effect, spray regularly with a fine mist of water.

With a rich, earthy patina - a favourite amongst landscapers, it blends effortlessly into any traditional or modern backyard or courtyard setting.
