

Pro Series Chicken Netting

Fencing Solutions / Pens & Enclosures

- Multiple stabiliser wires
- 5cm (2") hex aperture
- 1.0mm wire diameter
- Versatile netting for light duty applications
- Available at selected Bunnings stores only. Please check with your local store.

STABILISING WIRE FEATURE

Whites Pro Series Chicken Netting is a strong and flexible netting made from 1.0mm galvanised steel wire. Featuring multiple stabiliser wires along its length, this netting offers a robust combination of strength and reliability. With a 5cm aperture, it is an all-purpose netting ideal for poultry yards, chicken coops, plant protection and garden trellising.

Code	Product Description	Height
10674	Chicken Netting - 50m	120cm
10675	Chicken Netting - 50m	90cm
10676	Chicken Netting - 50m	180cm

Handy Hint:

- Be sure to take into account the wire diameter, aperture and roll size when selecting netting for a project.
- To view our entire range of mesh and netting click on the 'shadow board' image in the photo gallery at the top of this page
- It is recommended that new galvanised wire mesh used in aviaries and pet cages be treated to remove excess zinc that could possibly harm pets. Shave off any zinc spikes with a utility knife. The mesh should then be scrubbed with a mild solution of vinegar (2 cups in a bucket of water) and rinsed with clean water.
- Beware of coil when opening roll. Always wear gloves and eye protection when handling.
- When constructing a pet enclosure, try Whites steel [Ultraposts](#) for a strong and sturdy frame, securing the netting with [tie wire](#) or [netting clips](#). Alternatively, Whites [Garden Posts](#) offer a unique lug fixing

method for attaching netting.
